EDUCATION

- MRes Sensor Technologies and Applications**, University of Cambridge 2026 - 2027
• Fully funded by the Trinity-Prince Mahidol Studentship (awarded to one student every 3 years).
• Coursework in Machine Learning, Principles of Sensing, and Innovation Management; 2 research projects.
- MSci & BA (Hons) Natural Sciences** (Chemistry with Biochemistry & Mathematics), University of Cambridge 2022 - 2026
• First Class Honours; Senior Scholar, Trinity College (2024-26).
• Jardine Undergraduate Scholarship (full tuition and maintenance), a merit-based award given annually to 10 scholars from East and Southeast Asia.
- Kamnoetvidya Science Academy, Thailand**; A-levels A*A*A* (Maths, Chemistry, Biology); GPA 4.00/4.00 2019 - 2022
• National representative and finalist, International Science and Engineering Fair (ISEF), among 675 international participants at the largest global high-school science competition.
• Bronze medal, Asia Pacific Linguistics Olympiad: decoded problems in unseen languages under time pressure, relying on fast pattern recognition and learning on the spot.

EXPERIENCE

- CN Bio Innovations, Machine Learning Intern**, Cambridge, UK Jun - Aug 2026
• Trained ML models in Python, predicting drug-induced liver injury risk from organ-on-chip data while keeping results interpretable for internal scientists and clients.
• Deployed the best-performing model as a web app, letting scientists and clients run predictions without coding.
- Boston Consulting Group, Case Team Assistant**, Bangkok, Thailand Aug - Sep 2025
• Benchmarked the client's consumer goods portfolio against its major competitor across 11,000+ SKUs for a pricing project.
• Automated the analysis workflow in Python, cutting processing time by over 80%.
- Redington, a Gallagher company, Asset-Liability Management Intern**, London, UK Jul - Aug 2025
• Researched how inflation and interest rates drive equity-bond return correlation at an investment consultancy advising pension schemes; built a linear model explaining 81% of the variation.
• Wrote a research report on Bitcoin allocation for Managing Directors, demonstrating that an allocation of 5% maximised the portfolio's Sharpe ratio.
- Cambridge Consulting Network, Consultant**, Cambridge, UK Oct 2024 - Apr 2026
• Advised a biotech client on the market landscape and go-to-market strategy for a novel psychedelic therapeutic, positioning it as a third-line treatment for schizophrenia.
• Screened US states against cost, talent, market access, regulatory, and risk criteria; shortlisted 2 recommended states with the 2 highest potential sites in each state.
- MedTech Innovation Programme, Market Analyst**, Cambridge, UK Nov 2023 - Apr 2024
• Translated surgeon feedback into design requirements and aligned engineers and investors accordingly.
• Sized the global market at £98M and the obtainable market at £12M. Led competitor analysis for the device.

LEADERSHIP

- Head of Life Sciences and Deep Tech**; Cambridge University Venture Capital and Private Equity Society Aug 2026 - present
• Organised talks from VC funds for postgraduate students to learn more about entrepreneurship and fundraising.
- Co-President**; Cambridge University Chemical Society Jan 2026 - present
• Relaunched the society, growing membership to 120+ and running 6 events, including talks from startups, pharma, and life sciences consultancies.
- President**; Cambridge University Thai Society Apr 2023 - Mar 2024
• Directed strategic planning and financial management for a society of 80+ members.
• Built partnerships with Chinese, Malaysian, and Singaporean societies and hosted joint events.
- Alumni Officer, Treasurer**; Jardine Scholar Council Jan - Dec 2023, Jan 2026 - present
• Managed a budget of £6k for a society with 65+ members. Organised an alumni mentoring programme and an in-person networking event.

COMPETITIONS

- Winner**, Lucy Cavendish College Enterprise Challenge (2024)
• Pitched a new medical technology tool for remote surgery, winning £15k in equity investment.
- 4th place**, UCL Consulting Summit National Case Competition (2026)
• Presented a strategic plan for the incorporation of AI tools into the UK's education system.
